

这个窗口用来给我生产测试图片

好的，芬达明白。

这个窗口我就专门按“测试图片生产”来配合你：

你直接发参考图、角色设定、镜头要求、画幅、风格或一句话需求，我会尽量直接帮你生成测试图，不在这里混别的项目流程。

后面你可以直接这样发：

“按这张图，生成一张 16:9 测试图，人物不变，只改表情。”

或

“给我出 4 张办公室短剧测试图，锁定机位。”

Internal replication test based on a frame from Let the Bullets Fly, directed by Jiang Wen.

Recreate the visual structure of a close two-person outdoor reaction shot from the film. Two male characters are seated or leaning forward in the foreground, both looking toward the same off-screen subject. The left man wears a simple white shirt, has a short haircut and a serious alert expression. The right man is closer to camera, wearing a pale gray traditional robe with subtle dirt marks and a single eyepatch, his expression more calculating and tense.

Use warm natural daylight with soft shadows. The background should be an old town wall with blurred green foliage and earth-toned stone or plaster texture. Keep the shallow depth of field, with both faces clear and the background softly defocused.

Composition: widescreen cinematic frame, two-person close-up, right character slightly larger and closer to camera, left character slightly behind. Their heads form a subtle diagonal line, both gazes directed off-screen.

Preserve the dusty period texture, worn fabric, realistic skin, muted warm color palette, and restrained dramatic tension.

No subtitles, no watermarks, no added text, no modern objects.

Create a realistic widescreen cinematic still of two men in an old Chinese town, captured in a close outdoor reaction shot.

The two men are in the foreground, both leaning slightly forward and looking toward the same off-screen subject. The man on the left wears a plain white shirt, has a short haircut, and looks alert and surprised. The man on the right is closer to the camera, wearing a pale gray traditional long jacket with subtle dust and fabric texture. He has one eye covered by a rough leather eyepatch and gives a tense, calculating look.

The scene is lit by warm natural daylight with soft shadows. Behind them is an old earth-toned wall and blurred green foliage. Use shallow depth of field so the background becomes soft, while both faces remain sharp.

Composition: two-person close-up in a widescreen frame, right figure larger and closer, left figure slightly behind. Their heads form a diagonal rhythm, and their shared off-screen gaze creates suspense.

Color palette: muted warm beige, dusty gray, soft green, natural skin tones. Texture should feel period, worn, and realistic, not clean or modern.

No subtitles, no visible text, no logos, no watermarks, no modern clothing, no celebrity likeness.

Create an original realistic cinematic still set in an old small-town courtyard during warm daylight.

Two original adult men are shown in a close reaction shot. They sit or lean forward near an old wall, both looking toward something outside the frame. One man wears a simple light shirt and has a direct, alert expression. The other wears a dusty pale-gray period jacket and looks more guarded and suspicious. Their body language suggests they are witnessing an unexpected event.

Use soft natural daylight, shallow depth of field, muted warm beige and gray tones, and blurred green foliage in the background. The setting should feel aged, dusty, and lived-in, with worn fabric, weathered walls, and realistic skin texture.

Composition: widescreen frame, two-person close-up, slight diagonal head placement, shared off-screen gaze, restrained dramatic tension.

Do not reference or imitate any specific director, film, actor, character, celebrity face, known film still, logo, subtitle, watermark, or copyrighted scene. Avoid exact costume duplication and avoid recreating a recognizable shot.

Internal replication test based on the selected frame from *Let the Bullets Fly*, directed by Jiang Wen and shot by Zhao Fei.

Recreate a bright outdoor close reaction shot from the film's Goose Town power-game atmosphere. The frame shows two wealthy, high-status men in a 1920s Chinese town setting, both watching the same off-screen event. They are not ordinary villagers; they belong to the local power world, with clean clothing, confident posture, and controlled expressions.

Character-state target:

The man on the left wears a clean white Western-style open-collar shirt. He is wealthy but more reactive. His face is alert, slightly tense, and uncertain, as if he is trying to understand what has just happened off-screen.

The man on the right is closer to the camera and visually dominant. He wears layered upper-class clothing: a white inner shirt, a pale green or gray-green middle layer, and a light khaki silk-like outer jacket with soft reflective sheen. His expression is more confident, composed, and assessing. He appears calmer than the man on the left, as if he has more status, more information, or more control over the situation.

Spatial structure:

Use a compressed outdoor old-town courtyard space. The two men occupy the foreground. Behind them, keep a readable middle-ground old wall or courtyard wall with aged plaster and earth-toned stone texture. Behind that, add softly blurred yellow-green foliage and sunlit courtyard depth. The background should not become an empty blur; it must still read as an old town wall plus foliage.

Composition:

Widescreen cinematic frame. Two-person close-up. The right figure is larger, closer, and slightly more powerful in the frame. The left figure sits or leans slightly behind him. Their heads form a subtle diagonal line. Both gazes point toward the

same off-screen subject. The emotional relationship is unequal: shared attention, but different levels of control.

Color and exposure:

Make the image bright, sun-washed, and slightly overexposed, matching the daylight look of *Let the Bullets Fly*. Use lifted midtones, warm beige walls, pale khaki clothing, white shirt highlights, natural skin tones, and yellow-green foliage. The white shirt and silk-like khaki jacket should catch strong daylight and approach overexposure without losing all detail. Shadows remain soft and readable, not noir, not dark, not teal-orange modern grading.

Lighting:

Warm outdoor daylight, soft but strong. High-key daylight on faces and clothing. Slight highlight bloom on white fabric, skin, and wall. No heavy contrast. No dramatic night lighting.

Texture:

Realistic period-film texture, sunlit skin, visible fabric folds, silk-like jacket reflection, old plaster wall, dusty air, soft lens rendering, shallow depth of field, compressed background.

Negative constraints:

No subtitles, no watermarks, no added text, no modern objects, no modern sunglasses, no clean fashion-editorial look, no peasant rough-cloth clothing, no dark noir color grade, no cyberpunk colors.

Create a realistic widescreen cinematic still set in a bright early-20th-century Chinese old-town courtyard.

The frame shows two wealthy, high-status adult men in a close outdoor reaction shot. They are both looking toward the same off-screen event, but their emotional states are different.

Character-state target:

The man on the left wears a clean white Western-style open-collar shirt. He looks alert, slightly tense, and uncertain, as if he has just noticed something unexpected.

The man on the right is closer to the camera and visually dominant. He wears layered pale upper-class clothing: a white inner shirt, a muted pale green or gray-green middle layer, and a light khaki silk-like outer jacket with soft reflective highlights. His expression is confident, composed, and quietly calculating. He should feel wealthier, calmer, and more powerful than the man on the left.

Spatial structure:

Build three clear layers of space. Foreground: the two men, sharp and dominant. Middle ground: an aged old-town wall with warm earth-toned plaster or stone texture. Background: softly blurred yellow-green foliage and sunlit courtyard depth. The background should be shallow-focus but still readable as a real old-town exterior, not a blank blur.

Composition:

Two-person close-up in a widescreen frame. The right figure is larger and closer to camera, giving him more status and visual authority. The left figure is slightly behind and more reactive. Their heads form a subtle diagonal. Their shared off-screen gaze creates suspense and power tension.

Color and exposure:

Bright warm daylight, lifted midtones, slightly overexposed highlights. White shirt, pale khaki jacket, skin, and old wall should look sun-washed. Use warm beige, pale khaki, muted gray-green, natural skin tones, and soft yellow-green foliage. Keep shadows soft and readable. Avoid a dark, moody, low-key look.

Lighting:

Strong but soft outdoor daylight. High-key sunlit period-film look. Gentle highlight bloom on pale fabric and wall. No harsh black shadows, no modern glossy contrast.

Material detail:

Clean wealthy fabric, silk-like sheen on the khaki outer jacket, layered clothing, realistic skin, old plaster texture, dusty warm air, shallow depth of field, compressed lens perspective.

Negative constraints:

No subtitles, no visible text, no logos, no watermarks, no modern clothing, no celebrity likeness, no peasant costumes, no fantasy robes, no dark noir lighting, no fashion-ad styling.

Create an original realistic cinematic still set in a bright early-20th-century Chinese old-town courtyard.

Two original high-status men are captured in a close outdoor reaction shot near an aged courtyard wall. Both are watching the same off-screen event. The man on the left wears a clean white open-collar shirt and appears alert, tense, and slightly uncertain. The man on the right is closer to the camera and visually dominant. He wears layered pale clothing: a white inner shirt, a muted gray-green layer, and a light khaki silk-like outer jacket with soft reflective highlights. His expression is confident, composed, and quietly calculating, suggesting higher status and stronger control of the situation.

The space must have clear depth: sharp foreground figures, a readable middle-ground old plaster wall, and softly blurred yellow-green foliage in the background. Use a compressed cinematic perspective and shallow depth of field, but do not erase the old-town environment.

The image should be bright and sun-washed, with warm natural daylight, lifted midtones, and slightly overexposed highlights on the white shirt, pale khaki jacket, skin, and wall. Keep shadows soft and readable. The palette should include warm beige, pale khaki, muted gray-green, natural skin tones, dusty earth wall, and soft yellow-green foliage.

Composition: widescreen close two-person frame. The right figure is larger, closer, and more powerful in the composition. The left figure sits or leans slightly behind him. Their heads form a subtle diagonal, and their shared off-screen gaze creates restrained dramatic tension.

Material and texture: realistic skin, clean but period-appropriate wealthy fabric, silk-like jacket sheen, aged plaster wall, dusty sunlit air, soft filmic lens rendering.

Do not reference or imitate any specific director, film, actor, character, celebrity face, known film still, logo, subtitle, watermark, or copyrighted scene. Avoid exact costume duplication and avoid recreating a recognizable shot.

Internal replication test based on the selected frame from Let the Bullets Fly.

Recreate a bright but heavy outdoor close reaction shot from a 1920s Chinese power-game setting. Two wealthy, high-status men are near an old courtyard wall, both watching the same off-screen event. They are not ordinary villagers; they belong to the local power world, with clean but worn expensive clothing, controlled posture, and different levels of confidence.

Character-state target:

The man on the left wears a white Western-style open-collar shirt. He is wealthy but reactive, alert, tense, slightly anxious, trying to understand what has just happened off-screen.

The man on the right is closer to the camera and visually dominant. He wears layered upper-class period clothing: a white inner shirt, a muted olive-gray or gray-green middle layer, and a light khaki silk-like outer jacket with heavier fabric weight and dusty reflective sheen. His expression is composed, superior, quietly amused, and calculating. He should feel more powerful, more experienced, and more in control than the man on the left.

Spatial structure:

Use a compressed old-town courtyard space with strong spatial density. Foreground: the two men, sharp and dominant. Middle ground: a sun-baked old plaster wall, yellow-ochre, beige-gray, stained, cracked, and weathered, running diagonally behind them. Background: blurred yellow-green foliage and fragments of old courtyard architecture. The

background must not feel empty or clean; it should feel like a real dusty town wall pressed close behind the characters.

Composition:

Widescreen 2.35:1 cinematic frame. Close two-person reaction shot. The right figure is larger, closer, and heavier in the composition. The left figure is slightly behind and lower in visual authority. Their heads form a subtle diagonal line. Both gazes are directed toward the same off-screen subject, but their psychological states are different: left reactive, right dominant.

Color and exposure:

Bright sunlit daylight, but with stronger local contrast and denser midtones. The image should be sun-washed but not soft. Use slightly overexposed highlights on the white shirt, pale jacket, forehead, cheekbones, and old wall, while keeping the midtones thick and warm. Palette: dusty ochre wall, sun-baked beige, aged khaki, muted olive-gray, warm tanned skin, yellow-green foliage. Increase color density in the wall, skin, and khaki jacket. Avoid pale pastel tones.

Lighting:

Strong warm daylight, high-key but not flat. Harder sun direction with soft atmospheric diffusion. Faces should have visible sculpting, cheekbone shadows, brow shadows, and nose shadows, not beauty-light smoothness. Shadows stay readable but firmer than a commercial portrait. Add slight highlight bloom on white fabric and silk-like jacket, but keep texture.

Texture and material:

Realistic sun-beaten skin, visible pores, slight sweat, dusty fabric seams, worn collar edges, silk-like khaki jacket with heavier reflective folds, olive-gray inner garment, stained old plaster wall, dusty warm air. The image should feel like a period film frame, not a clean modern fashion shoot.

Lens and rendering:

Medium-long lens compression, shallow depth of field, realistic film sharpness, no ultra-clean digital polish. Keep the old wall readable even when softly defocused. No wide-angle distortion.

Negative constraints:

No subtitles, no watermarks, no added text, no modern objects, no modern sunglasses, no glossy fashion editorial styling, no clean TV-drama look, no pale pastel color grade, no soft beauty lighting, no peasant rough-cloth costumes, no fantasy robes, no dark noir grade.

Create an original realistic widescreen cinematic still set in a bright early-20th-century Chinese old-town courtyard.

Two original high-status men are captured in a close outdoor reaction shot near a sun-baked old plaster wall. They both look toward the same off-screen event, but their emotional states are unequal. The man on the left wears a white Western-style open-collar shirt. He looks wealthy but reactive, alert, tense, and slightly anxious. The man on the right is closer to the camera and visually dominant. He wears layered upper-class period clothing: a white inner shirt, a muted olive-gray or gray-green middle layer, and a light khaki silk-like outer jacket with heavier fabric weight and dusty reflective sheen. His expression is composed, superior, quietly amused, and calculating.

Build a dense old-town spatial structure: sharp foreground figures, a readable middle-ground yellow-ochre plaster wall with stains, cracks, and weathered texture, and softly blurred yellow-green foliage with fragments of old courtyard architecture in the background. Use a compressed medium-long lens perspective and shallow depth of field, but do not erase the location.

The image should be bright but heavy. Use warm sunlit daylight, slightly overexposed highlights, stronger local contrast, and denser midtones. The white shirt, pale khaki jacket, skin, and old wall should catch strong daylight, but the image must not become soft, pale, or pastel. Palette: dusty ochre, sun-baked beige, aged khaki, muted olive-gray, warm tanned skin, yellow-green foliage.

Faces should have visible sculpting: brow shadows, cheekbone shadows, nose shadows, realistic pores, slight sweat, and sun texture. Clothing should show dust on seams, worn collar edges, and heavy fabric folds. The old wall should feel stained, cracked, and lived-in. The overall look should feel like a period film frame with western-influenced hardness, not a modern clean fashion shoot.

Composition: 2.35:1 widescreen close two-person frame. The right figure is larger, closer, and more powerful. The left figure is slightly behind and more reactive. Their heads form a subtle diagonal, and their shared off-screen gaze creates restrained dramatic tension.

Do not reference or imitate any specific director, film, actor, character, celebrity face, known film still, logo, subtitle, watermark, or copyrighted scene. Avoid exact costume duplication and avoid recreating a recognizable shot.

Internal replication test based on the selected frame from Let the Bullets Fly.

Recreate a bright but controlled outdoor close reaction shot from a 1920s Chinese power-game setting. Two wealthy, high-status men stand or lean near an old courtyard wall, both watching the same off-screen event. They are not ordinary villagers; they are clean, well-dressed men from a local power circle.

Character-state target:

The man on the left wears a clean white Western-style open-collar shirt. He is wealthy but reactive, alert, slightly anxious, and trying to understand the off-screen situation.

The man on the right is closer to the camera and visually dominant. He wears layered upper-class period clothing: a white inner shirt, a muted gray-green middle layer, and a light khaki silk-like outer jacket. His expression is composed, confident, quietly amused, and calculating. He should feel more powerful and more in control than the man on the left.

Spatial structure:

Use a compressed old-town courtyard space. Foreground: two sharp male figures. Middle ground: a readable aged courtyard wall with warm beige, ochre, and gray-green undertones. Background: softly blurred yellow-green foliage and fragments of old courtyard architecture. The wall should feel old and sun-baked, but not excessively dirty or grimy. Keep the location dense and cinematic, not empty.

Composition:

Widescreen 2.35:1 cinematic frame. Close two-person reaction shot. The right figure is larger, closer, and heavier in the composition. The left figure is slightly behind and more reactive. Their heads form a subtle diagonal. Both gazes are

directed toward the same off-screen subject, but their psychological states are unequal: left reactive, right dominant.

Color grade:

Use a bright daylight period-film grade, not a modern clean digital look. Exposure is slightly pulled down from overbright daylight. Highlights are softened and restrained, especially on the white shirt, face, forehead, cheekbones, and khaki jacket. Midtones are lifted and dense. Blacks are raised above pure black, so the shadows stay readable and never crush to zero. Add stronger but controlled contrast.

White balance and color bias:

The overall white balance should have a subtle cyan-green bias in the neutral areas, shadows, wall, and white clothing shadows, similar to a digital cinema camera daylight image with a slight green-cyan cast. Preserve warm natural skin tones. Do not make the skin green. Palette: warm beige, muted ochre, gray-green, aged khaki, warm skin, yellow-green foliage.

Lighting:

Strong daylight, but graded and controlled. No blown-out harsh white highlights. No beauty-ad softness. Faces should have gentle cinematic skin smoothing: reduced micro-contrast, softened facial highlights, natural but controlled pores and wrinkles. Keep brow shadows, cheekbone shadows, and nose shadows visible, but not harsh.

Clothing and material:

The right man's outer jacket should feel expensive and heavy, silk-like or satin-like, with broad soft folds and a smooth weighty drape. Reduce excessive fine wrinkles. Keep subtle fabric texture and gentle sheen. The left man's white shirt should be clean but not glowing pure white. Clothing should look wealthy, controlled, and period-appropriate, not dirty peasant clothing.

Texture:

Aged plaster wall with restrained weathering, mild stains, sun-baked surface, and tactile texture. Clean heavy clothing with subtle age. Slight film grain, soft lens rendering, compressed background, realistic period-film density.

Negative constraints:

No subtitles, no watermarks, no added text, no modern objects, no modern sunglasses, no glossy fashion editorial styling, no clean TV-drama look, no pale pastel grade, no heavy grime, no dirty peasant costumes, no excessive fabric wrinkles, no crushed blacks, no harsh blown-out highlights, no fantasy robes, no dark noir grade.

Sorry, I can't help recreate or closely replicate a specific copyrighted film frame.

I can, however, create an original cinematic still that captures the general mood you described — for example:

- early-20th-century Chinese old-town courtyard

- two high-status men in a tense reaction shot
- bright controlled daylight
- layered wealthy period clothing
- unequal power dynamic
- dense courtyard wall and foliage background

If you want, send “make the original version” and I’ll generate that instead.

Create an original realistic 2.35:1 widescreen cinematic still set in a bright early-20th-century Chinese old-town courtyard.

NODE 00 — Character state and dramatic function:

Two original high-status adult men are captured in a close outdoor reaction shot. Both look toward the same off-screen event, but they do not share the same psychological position. The man on the left wears a clean white Western-style open-collar shirt. He is wealthy but reactive: alert, slightly anxious, trying to understand what has just happened. The man on the right is closer to camera and visually dominant. He wears layered upper-class period clothing: a white inner shirt, a muted gray-green middle layer, and a light khaki silk-like outer jacket. His expression is composed, confident, quietly amused, and calculating, suggesting stronger control of the situation.

NODE 01 — Spatial structure and lens:

Build a dense old-town courtyard space with clear layers: sharp foreground figures, a readable middle-ground aged courtyard wall, and softly blurred yellow-green foliage with fragments of old courtyard architecture in the background. Use medium-long lens compression and shallow depth of field. The location must feel compressed and cinematic, not wide-angle, not empty.

NODE 02 — Base exposure:

Bright daylight, but exposure is slightly pulled down from raw overbright sunlight. The image remains bright, not dark, but avoids floating washed-out highlights.

NODE 03 — Lift / shadow treatment:

Raise blacks above pure black. Shadows stay readable and never crush to zero. Add a subtle cyan-green bias in shadows, white-shirt shadow areas, wall shadows, and neutral tones. Keep the shadow floor clean, not muddy or dirty.

NODE 04 — Gamma / midtone treatment:

Lift and thicken the midtones. Skin, wall, and fabric should have dense midtone body. Reduce facial micro-contrast for gentle cinematic skin smoothing. Keep natural pores and wrinkles visible, but avoid raw harsh texture. Midtone color should feel muted but full, not pale pastel.

NODE 05 — Gain / highlight treatment:

Soften and restrain highlights on the white shirt, forehead, cheekbones, old wall, and khaki jacket. No harsh blown-out whites. Use smooth highlight roll-off and controlled daylight bloom. The shirt should be bright but not glowing pure white.

NODE 06 — White balance and palette:

Use a subtle cyan-green white balance bias in neutrals, wall, shirt shadows, and darker tones, while preserving warm natural skin. Palette: warm beige, muted ochre, aged khaki, muted gray-green, warm tanned skin, yellow-green foliage.

NODE 07 — Skin secondary:

Apply subtle cinematic skin smoothing. Reduced facial micro-contrast, softened facial highlights, controlled pores and wrinkles, natural warm skin tone. Do not create plastic beauty retouch. Preserve brow shadows, cheekbone shadows, and nose structure.

NODE 08 — Clothing secondary:

The right figure's outer jacket should look expensive and heavy, silk-like or satin-like, with broad soft folds and a smooth weighty drape. Reduce excessive fine wrinkle detail while preserving subtle material texture and sheen. The left figure's white shirt is clean, wealthy, and period-appropriate, not peasant clothing.

NODE 09 — Wall and background secondary:

The courtyard wall is aged and sun-baked, with controlled plaster texture, mild weathering, beige-ochre-gray undertones, but not filthy, not ruined, not heavy grime. Background foliage is yellow-green, softly blurred, and slightly desaturated.

NODE 10 — Texture and finishing:

Clean but dense period-film look. Slight film grain, soft lens rendering, compressed background, controlled contrast, raised blacks, softened highlights. No glossy fashion-ad styling, no modern TV-drama cleanness, no heavy dirt.

Negative constraints:

No subtitles, no visible text, no logos, no watermarks, no modern objects, no modern sunglasses, no celebrity likeness, no specific movie reference, no specific director reference, no exact film-frame recreation, no dirty peasant clothing, no heavy grime, no excessive wrinkles, no crushed blacks, no harsh blown-out highlights, no pale pastel softness.

Create an original realistic 2.35:1 widescreen cinematic still set in a bright early-20th-century Chinese old-town courtyard.

Two high-status adult men are shown in a close outdoor reaction shot near an old courtyard wall. Both look toward the same off-screen event, but their emotional states are unequal.

The man on the left wears a clean white Western-style open-collar shirt. He looks wealthy but reactive: alert, tense, slightly anxious, trying to understand what has just happened.

The man on the right is closer to the camera and visually dominant. He wears layered upper-class period clothing: a white inner shirt, a muted gray-green middle layer, and a light khaki silk-like outer jacket. His expression is composed, confident, quietly amused, and calculating, suggesting stronger control of the situation.

Composition and space:

Use a close two-person widescreen frame. The right figure is larger, closer, and more powerful. The left figure is slightly behind and more reactive. Their heads form a subtle diagonal. Use a compressed medium-long lens perspective and shallow depth of field. Keep three clear spatial layers: sharp foreground figures, a readable old courtyard wall in the middle ground, and softly blurred yellow-green foliage behind it.

Wall and background:

The wall should look old, sun-baked, and historically aged, but clean and controlled, not filthy, not ruined, not covered in heavy grime. Use ochre-gray plaster, warm beige, muted yellow, and slight gray-green undertones. Keep the wall texture visible but restrained.

Color grade:

Bright controlled daylight. The image should not be dark. Lower the raw daylight exposure slightly, but keep the scene bright. Increase midtone density and local contrast on faces, clothing, and wall. Add slightly richer saturation in the skin,

khaki jacket, ochre wall, and yellow-green foliage. Avoid pale pastel colors and avoid gray muddy color.

Shadows:

The dark areas are lifted above pure black and remain readable. Shadows are clean and controlled, not crushed, not dirty, not green-muddy. Add only a subtle cyan-green bias in neutral shadows and wall shadows.

Highlights:

White shirt, forehead, cheekbones, wall, and khaki jacket have softened controlled highlights. Bright but not blown out. No harsh pure-white clipping.

Skin:

Warm natural skin tones. Gentle cinematic skin smoothing. Reduce harsh facial micro-contrast, but keep natural pores, wrinkles, brow shadows, cheekbone structure, and nose shadows. Do not make the face dirty, overly rough, waxy, or plastic.

Clothing:

The right man's jacket is expensive and heavy, silk-like or satin-like, with broad smooth folds and weighty drape. Reduce tiny wrinkle noise. Keep subtle fabric texture and sheen. The white shirt is clean but not glowing pure white. Both men look wealthy and well-dressed, not peasants, not poor villagers.

Overall look:

Clean but dense period-film look. Brighter than a dark drama, heavier than a fashion photo. Controlled contrast, richer midtones, subtle cyan-green white balance bias in neutrals, warm skin preserved, slight film grain, soft lens rendering.

Negative constraints:

No subtitles, no text, no logos, no watermarks, no modern objects, no modern sunglasses, no celebrity likeness, no specific movie reference, no specific director reference, no exact film-frame recreation, no dirty wall, no heavy grime, no muddy green cast, no crushed blacks, no harsh blown highlights, no pale pastel softness, no glossy fashion-ad styling, no excessive wrinkles, no peasant clothing.

Create an original realistic 2.35:1 widescreen cinematic still set in a bright early-20th-century Chinese old-town courtyard.

Two original, anonymous high-status adult men are shown in a close outdoor reaction shot near an old courtyard wall. They must not resemble any real actor, celebrity, public figure, or recognizable film character. Avoid Hong Kong movie-star likeness. Avoid faces resembling Andy Lau, Chow Yun-fat, Ge You, Jiang Wen, or any known actor. The faces should feel original, period-appropriate, charismatic, and believable, but not celebrity-like.

Character relationship:

Both men look toward the same off-screen event, but their emotional states are unequal. The man on the left wears a clean white Western-style open-collar shirt. He is wealthy but reactive: alert, tense, slightly anxious, trying to understand what has just happened. The man on the right is closer to the camera and visually dominant. He wears layered upper-class period clothing: a white inner shirt, a muted gray-green middle layer, and a light khaki silk-like outer jacket. His expression is composed, confident, quietly amused, and calculating, suggesting stronger control of the situation.

Composition and space:

Close two-person widescreen frame. The right figure is larger, closer, and more powerful. The left figure is slightly behind and more reactive. Their heads form a subtle diagonal. Use compressed medium-long lens perspective and shallow depth of field. Keep three clear spatial layers: sharp foreground figures, readable old courtyard wall in the middle ground, softly blurred yellow-green foliage and old courtyard architecture behind it.

Clean old-town wall:

The wall is old, sun-baked, and historically aged, but not filthy, not ruined, not covered in heavy grime. Use ochre-gray plaster, warm beige, muted yellow, and restrained gray-green undertones. Texture is visible but controlled.

Color grade:

Bright controlled daylight with no gray veil. The image must be clear, not hazy, not foggy, not milky. Increase midtone

saturation and midtone color density, especially in skin, khaki fabric, ochre wall, and yellow-green foliage. Increase controlled midtone contrast so faces, clothing, wall, and foliage separate clearly. Avoid flat gray, low-saturation, muddy color.

Skin tone:

Skin must stay warm, alive, and slightly red-orange, with natural blood color and subtle cheek warmth. Preserve warm skin even if shadows have a slight cyan-green bias. Do not make the face gray, green, pale, waxy, or bloodless. Gentle cinematic skin smoothing is allowed, but keep natural facial structure, brow shadows, cheekbone shadows, nose shadows, pores, and wrinkles.

Shadows:

Dark areas are lifted above pure black and remain readable, but shadows should stay clean and contrasty, not milky. Add only a subtle cyan-green bias in neutral shadows, wall shadows, and white-shirt shadow areas. Do not apply cyan-green to skin. No muddy green cast.

Highlights:

White shirt, forehead, cheekbones, wall, and khaki jacket have softened controlled highlights. Bright but not blown out. No harsh pure-white clipping.

Clothing:

The right man's jacket is expensive and heavy, silk-like or satin-like, with broad smooth folds and weighty drape. Reduce tiny wrinkle noise, but keep subtle fabric texture and sheen. The white shirt is clean but not glowing pure white. Both men look wealthy and well-dressed, not peasants, not poor villagers.

Overall look:

Clean but dense period-film look. Bright daylight, richer midtones, controlled local contrast, subtle shadow cyan-green only, warm red-orange skin preserved, slight film grain, soft lens rendering, no gray haze.

Negative constraints:

No subtitles, no text, no logos, no watermarks, no modern objects, no modern sunglasses, no celebrity likeness, no actor likeness, no Andy Lau likeness, no Hong Kong movie-star face, no specific movie reference, no specific director reference, no exact film-frame recreation, no dirty wall, no heavy grime, no muddy green cast, no gray fog, no milky haze, no bloodless skin, no pale low-saturation skin, no crushed blacks, no harsh blown highlights, no glossy fashion-ad styling, no excessive wrinkles, no peasant clothing.

Create an original realistic 2.35:1 widescreen cinematic still set in a bright early-20th-century Chinese old-town courtyard.

Two original, anonymous high-status adult men are shown in a close outdoor reaction shot near an old courtyard wall. They must not resemble any real actor, celebrity, public figure, or recognizable film character. Avoid Hong Kong movie-star likeness. Avoid faces resembling Andy Lau, Chow Yun-fat, Ge You, Jiang Wen, or any known actor. The faces should feel original, period-appropriate, charismatic, and believable, but not celebrity-like.

Gentle cinematic skin smoothing is allowed, but keep natural facial structure, brow shadows, cheekbone shadows, nose shadows, pores, and wrinkles.

Shadows:

Dark areas are lifted above pure black and remain readable, but shadows should stay clean and contrasty, not milky. Add only a subtle cyan-green bias in neutral shadows, wall shadows, and white-shirt shadow areas. Do not apply cyan-green to skin. No muddy green cast.

Highlights:

White shirt, forehead, cheekbones, wall, and khaki jacket have softened controlled highlights. Bright but not blown out. No harsh pure-white clipping.

Clothing:

The right man's jacket is expensive and heavy, silk-like or satin-like, with broad smooth folds and weighty drape. Reduce tiny wrinkle noise, but keep subtle fabric texture and sheen. The white shirt is clean but not glowing pure white. Both men look wealthy and well-dressed, not peasants, not poor villagers.

Overall look:

Clean but dense period-film look. Bright daylight, richer midtones, controlled local contrast, subtle shadow cyan-green only, warm red-orange skin preserved, slight film grain, soft lens rendering, no gray haze.

Negative constraints:

No subtitles, no text, no logos, no watermarks, no modern objects, no modern sunglasses, no celebrity likeness, no actor likeness, no Andy Lau likeness, no Hong Kong movie-star face, no specific movie reference, no specific director reference, no exact film-frame recreation, no dirty wall, no heavy grime, no muddy green cast, no gray fog, no milky haze, no bloodless skin, no pale low-saturation skin, no crushed blacks, no harsh blown highlights, no glossy fashion-ad styling, no excessive wrinkles, no peasant clothing.

回顾一下我们这一整个会话的内容，然后检查我们的镜场计划原始计划表，有没有测试遗漏之处，请你去确认

我先按这个窗口已经测试过的图片链路做回顾，再去对照我能检索到的“镜场计划”历史规划信息，重点查：题材/构图/调色节点/合规转译/测试覆盖有没有漏项。

我这边确认了一点：当前可检索文件里没有直接搜到名为“镜场计划原始计划表”的独立文件标题。所以我会按我们之前整理过的执行链和这个窗口的全部测试记录来做一次“对照审计”，同时标出需要你后续补文件才能最终确认的部分。

确认了一遍：**这个窗口目前完成的是“同一类电影感双人反应镜头”的连续调参测试**，但对照“镜场计划”的原始思路，**还没算完整闭环，有测试遗漏**。

我先给你结论：

****已完成：****

我们已经把“早期中国旧城院落 / 两个高地位男性 / 近景反应镜头 / 右强左弱 / 明亮但有厚度 / 墙体与树叶分层 / 服装材质 / 肤色饱和 / 避免明星脸 / 避免具体电影引用”这一条主线连续测试了很多轮。

****未完成：****

还没有完成“镜场计划”里真正需要的系统化测试矩阵。现在更多是在一条镜头上反复调，而不是按计划表逐项验收。

1. 本窗口测试回顾

这次主要经历了 4 个阶段：

第一阶段：接近原片结构测试

最开始你用的是：

> Internal replication test based on a frame from Let the Bullets Fly...

这一版目标是直接复刻《让子弹飞》某个双人反应镜头结构，包括白衬衫、眼罩、旧城墙、浅景深、暖色阳光。

问题是：

这个方向太接近具体电影帧、具体人物状态、具体角色组合，所以后面触发了安全边界。

第二阶段：改成“描述性复刻”

你把它改成：

> Create a realistic widescreen cinematic still of two men in an old Chinese town...

这一阶段去掉了一部分片名和导演，但还保留了类似眼罩、双人构图、旧城反应镜头。

这一轮主要验证了：

- 双人近景构图可控；
- 右侧人物更大、更近；
- 左侧人物反应更紧张；
- 背景旧墙和绿色植物能出来；
- 但人物容易撞脸、服装容易变成普通村民或粗布装。

第三阶段：公开安全转译

你明确加入：

> Do not reference or imitate any specific director, film, actor, character, celebrity face, known film still...

这一步很关键，说明我们从“原片复刻”转到了“原创电影感场景”。

这一阶段的效果更安全，但出现了新问题：

- 画面有时太干净，像现代广告或电视剧；
- 男性脸型容易生成港片明星感；
- 右侧人物容易像刘德华、周润发、姜文、葛优类熟脸；
- 画面明亮了，但有时中间调发灰、皮肤缺血色；
- 有些图自动加了黑边 letterbox，这对测试不利。

第四阶段：节点化调色测试

你开始加入 NODE 00 到 NODE 10：

- Character state
- Spatial structure
- Base exposure
- Lift / shadow treatment
- Gamma / midtone treatment
- Gain / highlight treatment
- White balance
- Skin secondary
- Clothing secondary
- Wall and background secondary
- Texture and finishing

这个是目前最接近“镜场计划”方法论的部分。

它验证了：Image2 能吃比较复杂的节点化提示词，但还没有验证每个节点单独是否有效。

2. 对照“镜场计划”原始逻辑，当前完成度

按我们之前整理的镜场计划核心链路：

> 拉片分析 → 风格反推 → 镜头语言拆解 → 关键帧生成 → 合规发布

当前状态是：

| 模块 | 当前状态 | 判断 |

|---|---|---|

拉片分析	做了部分口头描述，但没有系统采样	未完成
风格反推	做了色彩、曝光、服装、空间反推	部分完成
镜头语言拆解	只拆了一个“双人近景反应镜头”	部分完成
关键帧生成	已连续生成多轮测试图	已完成单线测试
合规发布	后半段已转成原创安全提示词	基本完成
节点提示词验证	写了节点，但没做单节点消融测试	未完成
多镜头矩阵	基本没有展开	未完成
人物防撞脸	加了负面词，但效果还不稳定	未完成
色彩参数稳定性	方向清楚，但没有形成稳定模板	未完成

所以结论是：**这个窗口完成了一个核心样张方向的连续迭代，但还没有完成镜场计划的完整测试计划。**

3. 明确遗漏项

遗漏 1：A / B / C 三档提示词没有形成正式对照表

你之前提过：

- A：内部原片复刻
- B：描述性复刻
- C：公开安全转译

这个窗口实际经历了这三个方向，但没有整理成固定模板。

现在需要补的是：

| 档位 | 用途 | 当前问题 |

|---|---|---|

A 内部分析档	只用于拆解构图、光线、色彩，不直接生成近似帧	之前生成行为太接近原片
B 描述性复刻档	去掉片名导演演员，用视觉语言描述	已做，但还不够稳定
C 公开安全转译档	完全原创，可用于公开生产	已做，但还需优化防撞脸

这一项必须补，否则以后会在“复刻”和“原创转译”之间反复踩线。

遗漏 2：没有做“单节点消融测试”

你现在写的 NODE 提示词很完整，但问题是我們不知道：

- 是哪个节点真正让皮肤变红润；
- 是哪个节点让墙体不脏；
- 是哪个节点让中间调变厚；
- 是哪个节点导致灰雾；
- 是哪个节点导致明星脸；
- 是哪个节点导致黑边；
- 是哪个节点让服装变成丝绸但又太广告。

所以应该补一组测试：

1. 只测曝光节点；
2. 只测 Lift / shadow；
3. 只测 Gamma / midtone；
4. 只测 Skin secondary；
5. 只测 Clothing secondary；
6. 只测 Wall secondary；
7. 最后再合并。

现在我们只是一次性堆节点，无法判断每个节点的贡献。

遗漏 3：没有做多角度镜头测试

目前几乎全是同一种：

> 双人近景、右强左弱、墙边反应镜头。

但你之前提过想要多角度测试，包括：

- 俯视；
- 背面看两人；

- 低角度；
- 极近特写；
- 侧面；
- 中景；
- 远景；
- 手部或服装细节特写。

这些都还没有真正测试。

现在只证明了“正面/斜正面双人近景”可行，不能证明整套镜场可用。

遗漏 4：人物防撞脸测试不足

你已经加了：

> no Andy Lau likeness, no Chow Yun-fat, no Ge You, no Jiang Wen, no Hong Kong movie-star face

但生成结果仍然有“港片熟脸感”。

这说明光写负面词还不够，后面要正向指定：

- 更普通但有权势感的地方士绅脸；
- 非明星比例；
- 略不对称五官；
- 不完美下颌；
- 稍宽鼻翼；
- 不要精修偶像脸；
- 不要标准港片男主发型；
- 不要过度油头背发；
- 右侧人物可以更像地方商会会长、县城实权人物，而不是银幕明星。

这一项必须继续测，否则后面“复刻气质”会经常变成“撞明星脸”。

遗漏 5：画幅黑边问题没单独处理

有几张图生成了明显上下黑边。

这说明“2.35:1 widescreen cinematic still”容易被模型理解成“带电影黑边”。

后面提示词要明确加：

> full 2.35:1 image, no added black letterbox bars, no artificial cinematic borders, image itself should be cropped to widescreen ratio

这一项必须补进固定负面词。

遗漏 6：服装材质还没稳定

当前右侧人物的服装有时成功，有时像：

- 太亮的戏服；
- 太新的广告服；
- 太现代的中式高定；
- 太多细碎皱纹；
- 或者太薄、不够重。

需要单独测试“高地位男性服装材质库”：

- 丝绸外褂；
- 缎面长衫；
- 灰绿内搭；
- 米黄色外套；
- 厚重但不脏；
- 有旧时代权贵感，但不是清装、不是仙侠、不是民国剧影楼服。

遗漏 7：墙体“干净但旧”的平衡还没稳定

我们反复在两个极端之间摆：

- 太脏：像破败村子；
- 太干净：像旅游古镇或电视剧布景。

镜场计划需要的是：

> 旧、晒过、有历史，但不是脏乱差。

这个要单独做墙体测试：

- clean aged plaster wall；
- restrained stains；
- mild weathering；
- sun-baked ochre-gray surface；
- no heavy grime；
- no ruined wall；
- no dirty poverty texture。

遗漏 8：肤色红润问题还没完全固定

你一开始就反复说过：

****脸上缺少红润，饱和度不够，中间调不够。****

这个窗口后半段已经把“warm red-orange skin / natural blood color / cheek warmth”写进去了，但还没形成稳定配方。

建议固定为：

> warm living skin tone, subtle red-orange blood color, mild cheek warmth, no gray face, no green cast on skin, no bloodless pale skin, midtone skin saturation increased, preserve natural shadow structure

这个应该成为人物类测试的常驻皮肤节点。

4. 目前最应该补的测试顺序

我建议接下来不要继续盲目堆长提示词，而是按这个顺序补：

第一组：合规模板固定

目标：把 A / B / C 三档整理固定。

- A：只分析，不生成；
- B：视觉结构描述；
- C：原创安全生产提示词。

第二组：同一镜头的节点消融

目标：找到哪个节点最有效。

每次只改一个变量：

1. 基础版；
2. 加肤色红润；
3. 加中间调密度；
4. 加墙体控制；
5. 加服装材质；
6. 加防明星脸；
7. 加无黑边；
8. 最终合成版。

第三组：人物防撞脸专项

目标：避免刘德华、周润发、姜文、葛优、港片明星脸。

测试 4 种脸型：

1. 地方商会会长型；
2. 县城实权士绅型；
3. 留洋富商型；
4. 老派家族掌权者型。

第四组：多角度镜头矩阵

目标：证明这个镜场不只会生成一个镜头。

至少补：

- 正面双人近景；
- 侧面双人近景；
- 背面看二人望向事件；
- 低角度右侧权力人物；
- 左侧人物极近反应特写；
- 右侧人物极近表情特写；
- 中景展示庭院空间；
- 远景建立旧城权力场。

第五组：调色风格矩阵

目标：测试同一场景的不同调色节点。

- 明亮高 key；
- 明亮但厚重；
- 暖墙冷影；
- 高饱和中间调；
- 低饱和旧片感；
- 无灰雾清透版；
- 更强西部片硬度版。

5. 我的最终判断

****有遗漏，而且遗漏不是小问题。****

现在我们已经找到了一条不错的方向：

****原创早期中国旧城权力场双人反应镜头。****

但镜场计划要的是“可复制的方法”，不是“偶然出一张还行的图”。

所以当前状态应该标记为：

> 单镜头视觉方向初步跑通，未完成系统测试矩阵，未完成节点有效性验证，未完成多角度覆盖，未完成防撞脸稳定方案，未完成 A/B/C 三档模板归档。

下一步最该做的不是继续生成随机图，而是先把这条测试整理成：

****《镜场计划 | 旧城权力场双人反应镜头测试清单 v1》****

里面包含：

1. 已通过项；
2. 失败项；
3. 必补测试；
4. 固定安全提示词；
5. 固定负面词；
6. 节点消融测试顺序；
7. 多角度测试表。

Create an original realistic 2.35:1 widescreen cinematic still set in a bright early-20th-century Chinese old-town courtyard.

Show two original anonymous high-status adult men in a close outdoor reaction shot near an old courtyard wall. Both men are looking toward the same off-screen event, but their emotional states are different and unequal.

The man on the left wears a clean white Western-style open-collar shirt. He looks wealthy but reactive: alert, tense, slightly anxious, trying to understand what has just happened. His face should show concern and quick judgment.

The man on the right is closer to the camera and visually dominant. He wears layered upper-class period clothing: a white inner shirt, a muted gray-green middle layer, and a light khaki silk-like outer jacket. His expression is composed, confident, quietly amused, and calculating, suggesting stronger control of the situation. He should feel more powerful, more experienced, and more socially dominant than the man on the left.

Important face rule:

Both faces must be original and anonymous. Do not resemble any real actor, celebrity, public figure, Hong Kong movie star, or recognizable film character. Avoid any resemblance to famous Chinese actors. The faces should feel believable, period-appropriate, charismatic, and non-celebrity.

Composition and lens:

Use a close two-person widescreen frame. The right figure is larger, closer, and more dominant. The left figure is slightly

behind and more reactive. Their heads form a subtle diagonal. Use a compressed medium-long-lens perspective and shallow depth of field. Build three clear spatial layers: sharp foreground figures, a readable old courtyard wall in the middle ground, and softly blurred yellow-green foliage and old courtyard architecture in the background.

Wall and environment:

The courtyard wall should look old, sun-baked, historically aged, and textured, but controlled and clean — not filthy, not ruined, not covered in heavy grime. Use warm ochre-gray plaster, muted yellow-beige, and restrained gray-green undertones. Keep the space dense and cinematic, not empty.

Color and grading:

Bright controlled daylight. Keep the scene bright, but slightly pull down the raw exposure from harsh sunlight. Increase midtone density, midtone saturation, and controlled local contrast, especially on the faces, khaki jacket, ochre wall, and yellow-green foliage. The image should feel richer and fuller, not pale, not washed out, not low-saturation, not gray.

Skin tone:

Skin must look warm, alive, healthy, and slightly red-orange, with clear blood color and subtle cheek warmth. The faces need gentle cinematic skin smoothing and softened facial highlights, but should still keep natural structure, pores, wrinkles, brow shadows, cheekbone shape, and nose definition. Do not make the faces gray, green, bloodless, dirty, waxy, or plastic.

Shadows:

Shadows are lifted above pure black, but remain clean and readable. Add only a subtle cyan-green bias in neutral shadows, wall shadows, and white-shirt shadow areas. Do not apply cyan-green to skin. No muddy green cast.

Highlights:

White shirt, forehead, cheekbones, wall, and khaki jacket should have softened, controlled highlights. Bright but not blown out. No harsh clipping.

Clothing:

The right man's jacket should feel expensive, heavy, silk-like, and smooth, with broad soft folds and a weighty drape. Reduce excessive tiny wrinkles. Keep subtle sheen and fabric texture. The left man's white shirt is clean and wealthy, not glowing pure white.

Overall look:

Clean but dense period-film look. Richer midtones, healthier skin, slightly stronger saturation, controlled contrast, subtle cyan-green only in neutral shadows, warm skin preserved, slight film grain, soft cinematic rendering, clear air, no haze.

Negative constraints:

No subtitles, no text, no logos, no watermarks, no modern objects, no modern styling, no celebrity likeness, no specific movie reference, no exact film-frame recreation, no dirty peasant clothing, no heavy grime, no muddy green cast, no gray haze, no milky fog, no bloodless skin, no pastel flatness, no glossy fashion-ad look.

Create an original realistic 2.35:1 widescreen cinematic still set in a bright early-20th-century Chinese old-town courtyard.

Show two original anonymous high-status adult men in a close outdoor reaction shot near an old courtyard wall. Both men are looking toward the same off-screen event, but their emotional states are different and unequal.

Highlights:

White shirt, forehead, cheekbones, wall, and khaki jacket should have softened, controlled highlights. Bright but not blown out. No harsh clipping.

Clothing:

The right man's jacket should feel expensive, heavy, silk-like, and smooth, with broad soft folds and a weighty drape. Reduce excessive tiny wrinkles. Keep subtle sheen and fabric texture. The left man's white shirt is clean and wealthy, not glowing pure white.

Overall look:

Clean but dense period-film look. Richer midtones, healthier skin, slightly stronger saturation, controlled contrast, subtle cyan-green only in neutral shadows, warm skin preserved, slight film grain, soft cinematic rendering, clear air, no haze.

Negative constraints:

No subtitles, no text, no logos, no watermarks, no modern objects, no modern styling, no celebrity likeness, no specific movie reference, no exact film-frame recreation, no dirty peasant clothing, no heavy grime, no muddy green cast, no gray

haze, no milky fog, no bloodless skin, no pastel flatness, no glossy fashion-ad look. Correction focus:

Keep the subtle cyan-green bias only in neutral shadows, wall shadows, and white-shirt shadow areas. Do not let the cyan-green cast affect skin, lips, cheeks, or forehead. Preserve warm skin tones clearly. The image must remain clean and clear, with no gray-green veil, no muddy green wash, and no dirty atmospheric haze.

Create an original realistic 2.35:1 widescreen cinematic still set in a bright early-20th-century Chinese old-town courtyard.

Show two original anonymous high-status adult men in a close outdoor reaction shot near an old courtyard wall. Both men are looking toward the same off-screen event, but their emotional states are different and unequal.

The man on the left wears a clean white Western-style open-collar shirt. He looks wealthy but reactive: alert, tense, slightly anxious, trying to understand what has just happened. His face should show concern and quick judgment.

The man on the right is closer to the camera and visually dominant. He wears layered upper-class period clothing: a white inner shirt, a muted gray-green middle layer, and a light khaki silk-like outer jacket. His expression is composed, confident, quietly amused, and calculating, suggesting stronger control of the situation. He should feel more powerful, more experienced, and more socially dominant than the man on the left.

Important face rule:

Both faces must be original and anonymous. Do not resemble any real actor, celebrity, public figure, Hong Kong movie star, or recognizable film character. Avoid any resemblance to famous Chinese actors. The faces should feel believable, period-appropriate, charismatic, and non-celebrity.

Composition and lens:

Use a close two-person widescreen frame. The right figure is larger, closer, and more dominant. The left figure is slightly behind and more reactive. Their heads form a subtle diagonal. Use a compressed medium-long-lens perspective and

shallow depth of field. Build three clear spatial layers: sharp foreground figures, a readable old courtyard wall in the middle ground, and softly blurred yellow-green foliage and old courtyard architecture in the background.

Wall and environment:

The courtyard wall should look old, sun-baked, historically aged, and textured, but controlled and clean — not filthy, not ruined, not covered in heavy grime. Use warm ochre-gray plaster, muted yellow-beige, and restrained gray-green undertones. Keep the space dense and cinematic, not empty.

Color and grading:

Bright controlled daylight. Keep the scene bright, but slightly pull down the raw exposure from harsh sunlight. Increase midtone density, midtone saturation, and controlled local contrast, especially on the faces, khaki jacket, ochre wall, and yellow-green foliage. The image should feel richer and fuller, not pale, not washed out, not low-saturation, not gray.

Skin tone:

Skin must look warm, alive, healthy, and slightly red-orange, with clear blood color and subtle cheek warmth. The faces need gentle cinematic skin smoothing and softened facial highlights, but should still keep natural structure, pores, wrinkles, brow shadows, cheekbone shape, and nose definition. Do not make the faces gray, green, bloodless, dirty, waxy, or plastic.

Shadows:

Shadows are lifted above pure black, but remain clean and readable. Add only a subtle cyan-green bias in neutral shadows, wall shadows, and white-shirt shadow areas. Do not apply cyan-green to skin. No muddy green cast.

Highlights:

White shirt, forehead, cheekbones, wall, and khaki jacket should have softened, controlled highlights. Bright but not blown out. No harsh clipping.

Clothing:

The right man's jacket should feel expensive, heavy, silk-like, and smooth, with broad soft folds and a weighty drape. Reduce excessive tiny wrinkles. Keep subtle sheen and fabric texture. The left man's white shirt is clean and wealthy, not glowing pure white.

Overall look:

Clean but dense period-film look. Richer midtones, healthier skin, slightly stronger saturation, controlled contrast, subtle cyan-green only in neutral shadows, warm skin preserved, slight film grain, soft cinematic rendering, clear air, no haze.

Negative constraints:

No subtitles, no text, no logos, no watermarks, no modern objects, no modern styling, no celebrity likeness, no specific movie reference, no exact film-frame recreation, no dirty peasant clothing, no heavy grime, no muddy green cast, no gray

haze, no milky fog, no bloodless skin, no pastel flatness, no glossy fashion-ad look. Correction focus:

Strengthen the difference in psychological status. The left man must feel reactive, alert, and slightly anxious. The right man must feel calmer, more confident, more socially powerful, and more in control. Keep both faces fully original and anonymous, with no resemblance to any celebrity or known actor. Avoid movie-star facial glamour. Use believable period faces with character, not star likeness.

我需要你将此文档内全部的对话从聊天起始第一个字开始，一字不落的全部放进一个 docx 文件中，顺序也不要调整，完整的提示词和图片
